All notable changes follow [Keep a Changelog](#) and Semantic Versioning.

[0.1.1] - 2025-11-08

Added

- Exported `__version__` = "0.1.1" in the package to make the shipped version programmatically discoverable.
- Added `requirements.txt` for the Operating Procedure in the README (PySide6 and jsonschema).

Maintenance

- Prepared release notes and tagging per Change Control direction; no functional code changes.

[0.1.0] - 2025-10-30

Added

- Packaged the PySide6 progress board with snapshot polling, repository detail view, and worker hand-off controller.
